THOMSON REUTERS

## **User Manual 2015**

### **Key Word Searching Options**

There are two different options in Westlaw India, when it comes to key words searching. They are:

- Natural Language search option
- Terms & Connectors Search option

### **Natural Language Option**

This search facility does not use Terms and Connectors but allows you to describe your issue, "for eg: Must a

manufacturer disclose the side effects of a drug?".

When you use Natural Language, you retrieve a maximum of 100 results. When your search is complete, the documents are returned in order of relevance.

- 1. Natural Language option can be selected by clicking on the Natural Language link on the Home Page
- 2. When the search is conducted through Natural Language, results retrieved will be listed by relevance (most relevant document will be on top).
- 3. Yellow highlight will signify where the keywords have been found in the documents.
- 4. While scrolling through the documents, you will notice a sentence / paragraph or paragraphs highlighted in green. This area denotes the best part of the document related to your keywords (it is enough to read through this area to understand the

### **Terms & Connectors**

**AND** - This can be used between words to ensure, all the words are searched for. Westlaw will throw up only those documents in which all the terms have been found Eg:

Arbitrator & rights & Jurisdiction

**OR** - OR is used to search for either of the words. Usually used for searching synonymous or similar meaning words. Eg: attorney or counsel

" " - To search a couple or more words together. This can be used even to search for a longer phrases. Eg: "Infringement of copyright"

**/S** - This connector helps searching for words in the same Sentence. Eg: Right /s arbitrator /s jurisdiction

# $(\bigcirc)$

THOMSON REUTERS

## **Key Word Searching Options**

**/p** - Using this connector in between words, will ensure Westlaw India throws only those documents in which the words are found in the same paragraph. Eg: right /p counsel

+S - Apart from ensuring that the words are found in the same sentence, +s also ensures that the first term precedes the next in the same sentence. Eg: infringement +s patent

+p - The first term preceding the second within the same paragraph. Eg: right +p counsel

**/n** - Search terms within "n" terms of each other (where "n" is a number). Eg: person /3 jurisdiction. /3 can also be replaced with +3 to define the order of the words. "n" can be any number

% - Documents not containing the term or terms following the % symbol: Eg: murder % rape. Use the % connector with caution; it may cause relevant documents to be excluded from your search result.

### **Wild Card Characters**

#### **Root Expander**

To search for terms with multiple endings use the '!' character. For example object! will retrieve object, objected, objection, objecting, objectionable.

#### **Universal Character**

To search for words with variable characters, use the \* character. When you place the universal character within a term, it requires that a character appear in that position. For example, withdr\*w will return withdraw and withdrew.

#### **Irregular Plural**

Westlaw India will automatically retrieve irregular plurals. For example, entering child will also retrieve children and goose will also retrieve geese.

#### **Turning off Plurals**

You can turn off plurals of a particular term by placing the # symbol in front of the term. To retrieve damage but not damages, type #damage. Placing the # symbol in front of a term also turns off the automatic retrieval of equivalencies. To retrieve child but not children enter #child.

#### **Compound Terms**

Typing good-will will retrieve good-will, goodwill and good will.
